Continental Eagle Pty Ltd

**OUR BUSINESS IS SUPPORTING
OUR CUSTOMERS**

Continental Eagle Pty Ltd

....Since 1991

- Continental Eagle Pty Ltd was established in Australia in September 1991 by Continental Eagle Corporation, the worlds oldest and largest manufacturers of cotton ginning machinery. Narrabri was chosen to be centrally located and prominently placed to service the Australian cotton ginning industry with Continental Eagle cotton gin replacement parts. In 1995 we diversified into Industrial Engineering Supplies and since then we have grown servicing all sectors of the cotton industry and all agriculturally based industries, the mining & resource industry, seed processing & grain storage industry and general trade throughout NSW , QLD and VIC.

The very nature of the industry we serve demands a consistent approach in achieving customer satisfaction. This requires the development of long-term relationships which we have enjoyed with our customers. Continental Eagle strives to achieve this objective, as it is the very essence of its ideology.
