SUPPORTS LOCAL JOBS”**

COMPANY PROFILE

History of Continental Eagle

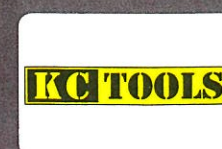

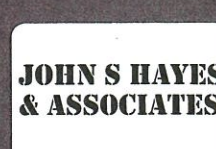

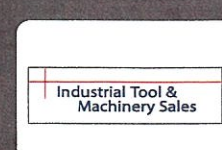

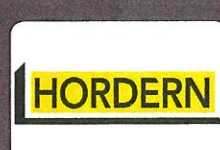

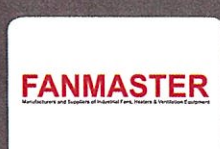

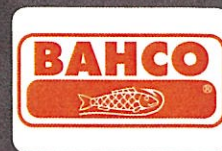

Continental Eagle Pty Ltd was established in Australia on the 2nd September 1991 by Continental Eagle Corporation Prattville Alabama USA, the worlds oldest and largest manufacturers of cotton ginning machinery. Narrabri was chosen to be centrally located and prominently placed to service the cotton ginning industry with Continental Eagle and competitors cotton gin replacement parts. In 1995 we diversified into the business of Industrial Engineering Supplies. Since then we have grown servicing the requirements to all areas of the cotton industry, shire councils, agricultural industry, seed processing & grain storage industry and the general public throughout the North West of NSW and the South West of QLD, more recently the coal mining and natural gas industry.

Our Vision

The very nature of the industry we serve demands a consistent approach in achieving customer satisfaction. This requires the development of long term relationships which we have enjoyed with our customers. Continental Eagle strives to achieve this objective, as it is the very essence of its ideology.
